Activities

We offer a variety of exciting snow activities in addition to skiing and snowboarding.

01 Chibikko Hiroba (Kids Park)

This newly-crafted children's area was designed specifically to be a safe and enjoyable slope for parents and kids to ski or sled together. In addition, a new activity here: Jigatake Snow Tubing! Feel the exhilaration of this 120-meter-long course that banks left and right along its length.

02 Exciting snow activities

■ Snowmobile Forest Tour

Tour Jigatake's sidecountry by snowmobile! Snowmobiles are relatively rare in Japan, especially outside of ski resorts, but this exciting hands-on tour allows you to venture a little deeper into the mountains on a snowmobile - that you drive yourself! Come explore and enjoy the fantastic natural landscapes of the Northern Alps!

03 Night Skiing

Jigatake Snow Resort is open for night skiing weekly on Fridays and Saturdays throughout the season. On these days the slopes are regroomed after daytime operation ends and before night skiing begins, allowing you to enjoy fresh turns on fully-reset corduroy slopes!

04 Jigatake Snow Park

Jigatake's newly opened Snow Park is a fantastic place for experienced freestylers to have fun showing off their jumps, spins, and tricks, or for newbies to work on building their park skills. Either way, come check it out!

05 Carefully Crafted Cuisine

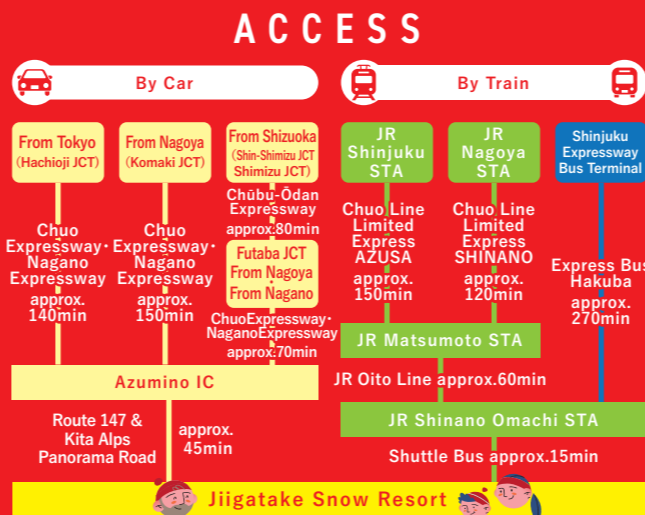

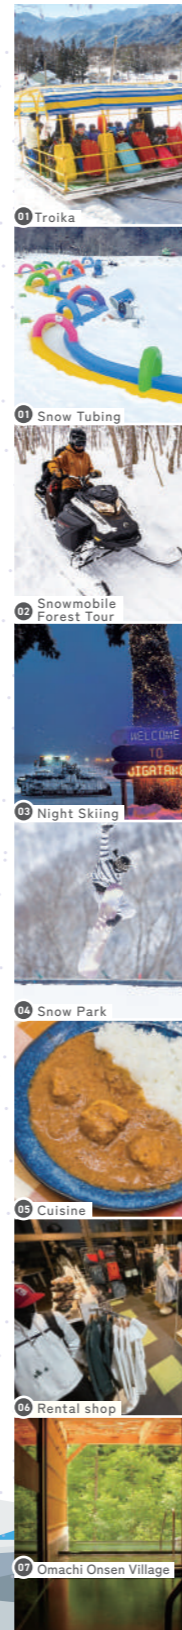

The restaurant set inside the resort's Echo House offers a wide variety of food choices, ranging from classic options like hot noodles and hearty set meals, to newly-added fare such as authentic spice curry; a delicious Japanese twist on Indian-style curry.

06 No gear? No problem!

For those new to winter sports, we have you covered. Our newly renovated rental shop has a full lineup of equipment, clothing, and accessories to outfit you for your time on the slopes.

07 Omachi Onsen Village

Omachi Onsen Village, or Omachi Onsenkyo, is a popular hot spring area. Conveniently located just 10 minutes by car from Jigatake Snow Resort, the onsenkyo can easily be visited as a day trip, or one of the many hotels and ryokans could serve as a convenient base for skiing and other winter sports.

Make your snow mountain debut at Jigatake!

Jigatake Snow Resort is well-suited for kids and beginners with the majority of runs set on moderate to gentle slopes.

1 Chibikko Slope

The first thing you notice about Jigatake's Chibikko Slope is how broad it is. This newly-crafted children's area was designed specifically to be a safe and enjoyable slope for parents and kids to ski or sled together.

2 Debut Slope

The Debut Slope was designed specifically for new skiers and snowboarders. The gentle grade and flat surface allows you to make your way down safely and comfortably.

NEW 3 Poluru Course

Poluru is a new, shorter distance tree run area perfect for those just starting to venture away from the groomers!

4 Raicho Course

The Raicho Course is a fun, fast run that starts off steep but gradually eases into a more moderate gradient further along. These characteristics make it well-suited to hosting badge tests and other certification exams.

8 Rabbit Course

The Rabbit Course starts at the top of the resort and runs all the way to the bottom alongside the 2nd Pair Lift. The first half of the run is wide-open and free of crowds, and the slope maintains a fairly consistent angle throughout its entire length.

5 Echo Slope

The Echo Slope is the resort's expansive main run and a top choice for beginners. The slope features a gentle gradient and unobstructed views from top to bottom, making it both enjoyable and easily navigable.

6 Kamoshika Course

The Kamoshika Course is the resort's longest, stretching uninterrupted for an impressive 1,500 meters. The first, steepest portion of the run cruises through quiet stands of trees before transitioning to more open, gentler terrain. Kamoshika is an enjoyable option for beginner and intermediate skiers and boarders, with only the first part of the slope providing a moderate challenge.

7 Rinkan Course

The Rinkan Course is a fun, winding run through a pleasant forested area that will appeal to beginner and intermediate skiers and snowboarders who are getting more comfortable on the snow and gaining confidence in their turns. The run itself has been widened, and is now even easier to ski.
